

The logo for HyRaMP, featuring the text "HyRaMP" in a white, sans-serif font. The letter "H" is partially enclosed by a white circular arc that starts on the left and ends on the right, with a small gap at the top. The background of the top banner is a blue sky with white clouds and a faint, large, semi-transparent circular graphic element on the right side.

HyRaMP

European Regions and Municipalities
Partnership on Hydrogen and Fuel Cells

- HyRaMP History and Mission;
- HyRaMP Members
- HyRaMP Board members
- HyRaMP Activities

March 2006	Regions Meeting Turin, Italy
October 2006	Regions' session at HFP General meeting, Brussels
October 2007	Establishment of Regions' Taskforce to establish Regions Partnership
April, 2008	Inauguration of European Regions and Municipalities Partnership for Hydrogen and Fuel Cells, HyRaMP.
June 2, 2008	HyRaMP Board and hand-over of relevant results of EU Projects Roads2HyCom and Hylights;
Mid July , 2008	Establishment of communication structure with Industrial Grouping and Research Grouping;
October 2008	First General Assembly legal structure and fee was established
December, 2008	HyRaMP permanent structure established .

HyRaMP's mission is to provide the European Regions and Municipalities with a representative body that can be coherent, distinguishable and influential towards the European FCH JTI and all relevant stakeholders and decision makers at both public and private level. The Partnership allows its Members to play a key role in the implementation of strategies that aim for the uptake of FCH technologies and particularly that of the FCH JTI.

**gion of Abruzzo
Region**

- Assume an active role towards the European FCH JTI and when appropriate participate in ad hoc Working Groups and/or Committees;
- Actively harmonise their activities and funds towards the development and deployment of Fuel Cell and Hydrogen Research, Development and Demonstration activities (referred to also as “FCH RD&D activities”);
- Utilize the potential of European Regions and Municipalities as incipient markets leading to large-scale deployment and uptake of Fuel Cell and Hydrogen technologies (referred to also as “FCH technologies”);
- Coordinate and propagate the collaboration with non-European activities;
- Accelerate the inception of Regulations, Codes and Standards (referred to also as “RCS”) as well as the harmonization of the homologation and permitting processes of products, applications and infrastructure;
- Facilitate the information exchange process among its Members prior to and towards the deployment of joint “green”, sustainable, public procurement strategies in the field of FCH technologies;
- Develop and apply benchmarks for economic and environmental evaluation of FCH RD&D projects in order to secure political acceptance and sustainability;
- Exchange knowledge and experience developed among its Members to actively promote FCH technologies and allow for a market breakthrough.
